

MOBIADO UNVEILS THE PROFESSIONAL™ 105 ZAF COLLECTION: UNIQUE. ELEGANT. ADVANCED.

Vancouver, Canada - May 19th, 2008: Mobiado continues the tradition of the iconic Professional Line – today unveils the thinnest luxury phone in the world at a thickness of only 10.6mm, the Professional 105 ZAF.

The Professional 105 ZAF redefines the luxury mobile phone to create an engineering masterpiece. The entire front and back of the phone has been crafted from large pieces of sapphire crystal, providing a modern minimalist look with a wear resistance second only to diamond. The Professional 105 ZAF utilizes a unique and hidden sliding battery cover mechanism (patent pending) with the battery cover being made entirely from one piece of sapphire crystal. The phone frame is precision CNC machined from aircraft aluminum to create a strong yet light body, polished, and then anodized it to produce a ceramic surface for the toughest of uses. The buttons and screws are beautifully machined and polished from stainless steel. The iconic Professional 105 ZAF is available in six designer colors (black, black satin, blue, grey, red, and silver). Once you hold one, you will never want to let it go.

The Professional 105 ZAF is unlocked, quad-band GSM/EGSM and dual-band WCDMA network operational. It works within North America, Europe, Africa, Asia- Pacific, and South America where GSM/EGSM 850/900/1800/1900 and WCDMA 850/2100 networks are available. It is equipped with a 2 megapixel camera and video camera, more than 1 GB internal memory, 2" display with up to 16 million colors, Bluetooth and micro USB connectivity, and a music player that supports AAC, eAAC+, and MP3 audio formats.
