

MOBIADO INTRODUCES THE PROFESSIONAL 105GCB ROSE: THE TRADITION CONTINUES.

Vancouver, Canada - May 18th, 2009: Mobiado continues the tradition of the gold GCB series with the rose gold plated Professional 105GCB (PRO105GCB Rose).

Combining age-old techniques used with Swiss mechanical watches and the modern simplicity of large pieces of sapphire crystal; the PRO105GCB Rose is a stunning masterpiece with classic details.

The frame is precision CNC machined from solid brass and is then finished with a 10 micron thick 18-karat rose gold plating. The screws are gun metal black stainless steel. The buttons of the PRO105GCB Rose are sapphire crystal, hand painted with 18-karat rose gold, to produce a front surface made entirely of sapphire crystal. The PRO105GCB Rose is modern marvel with a classic flare.

All the lettering and symbols on the PRO105GCB Rose are hand painted with 18-karat rose gold. Using a unique painting process, the gold keypad visibly disappears and becomes illuminated when the keypad lights up, creating a dramatic effect when used in low light conditions.

Using the construction of the Professional 105 ZAF lineup, the entire front and back of the PRO105GCB Rose have been crafted from large pieces of sapphire crystal, providing a modern minimalist look with a wear resistance second only to diamond. The PRO105GCB Rose utilizes a unique and hidden sliding battery cover mechanism (patent pending) with the battery cover being made entirely from one piece of sapphire crystal.

The PRO105GCB Rose is unlocked, quad-band GSM/EGSM and dual-band WCDMA network operational. They work within North America, Europe, Africa, Asia- Pacific, and South America where GSM/EGSM 850/900/1800/1900 and WCDMA 850/2100 networks are available. They are equipped with a 2 megapixel camera and video camera, more than 1 GB internal memory, 2" display with up to 16 million colors, Bluetooth and micro USB connectivity, and a music player that supports AAC, eAAC+, and MP3 audio formats.
